DETAILED ACTION

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark Rozman [Reg.No.42117] on 26 November 2007.

2. In claim 42, line 2, replace "the tag storage unit" with "one tag storage unit of the plurality of tag storage units".

Statement of Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable for citing the limitation "buffer logic to determine whether at least a portion of the first data value stored in the buffer unit corresponds to the address value based on, at least in part, detection of an overflow signal".

Claim 34 is allowable for citing the limitation "the validation indicators are to indicate that data within all of the buffers is invalid if the buffer control unit receives a

clear signal from the processor core". The Applicant specification teaches an embodiment of the invention wherein "whenever data is written to any memory location corresponding to data stored in one of the load buffers, all of the load buffers are invalidated ..." (see page 12 of the specification, paragraph [0036]).

Claim 40 is allowable for citing the limitation "overflow logic to indicate if a corresponding buffer includes valid data based, at least in part, on an overflow signal from the adder".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

A handwritten signature in black ink, appearing to read "Donald Sparks", written in a cursive style.
